Aichi Steel Corporation

Exhibiting at 2016 Tokyo International Packaging Exhibition (Tokyo Pack 2016)

～Compact Ferrous Foreign Object Detector for Food Safety～

Aichi Steel Corporation (Headquarters: Tokai City, Aichi Prefecture; President: Takahiro Fujioka) will be exhibiting at the 2016 Tokyo International Packaging Exhibition (Tokyo Pack 2016)

At this exhibition, in addition to packaging materials and equipment, we will also exhibit analysis and measuring equipment aimed at improving the safety and quality of food production. Our company, utilizing our expertise in highly sensitive magnetic sensors, has created a compact ferrous foreign object detector in the shape of a thin board that works by simply placing the object that is to be scanned on top of the board.

【Exhibition Overview】

1. Time Period: October 4th(Tues) to 7th(Fri), 10am to 5pm
2. Venue: Tokyo Big Site (Tokyo International Exhibition Center), East Hall, Section 6
3. Booth Number: East Hall 6-01

【Exhibited Products】

The highly sensitive magnetic sensor-based Compact Ferrous Foreign Object Detector

The system is used to visualize unseen ferrous foreign matter, and though easily used by the lay customer, will be demoed to show its potential in food production lines. We will be demoing how to effectively utilize our system in food production lines and at point of sale.

In today's society where customers are increasingly worried about food safety, our system is a very effective food scanning system. Please visit our booth to see the latest food inspection system.
